This second edition ICISi Masterclass in Imaging of Pancreatic Tumours will be delivered online as a one-day workstation-based teaching course which will highlight current imaging techniques, image interpretation and pitfalls in the evaluation of solid and cystic pancreatic tumours. Participants must have access to two screens for the duration of the course. As this is an **interactive course**, we ask that you join using a device with a camera to achieve the optimum experience. Please refer to the joining instructions for full details of screen requirements (see the ICIS website for details).

Each session will comprise a 15-minute didactic lecture followed by workshop-style teaching with online access to individual imaging workstations. With just 22 spaces available, participants will benefit from the opportunity to learn in a small group through hands-on, case-based learning, with cases chosen to illustrate specific learning points.

Learning objectives

- To learn the guidelines-based imaging criteria for pancreatic cancer staging.
- To understand the optimal approach to imaging patients post neoadjuvant chemoradiotherapy for pancreatic cancer.
- To assess treatment response, complications of treatment and detection of recurrent disease.
- To acquire knowledge on different cystic lesions of the pancreas, in order to be able to interpret the different imaging findings of cystic lesions and to understand the best approach to these different lesions.

Key Features

- Mentored case-based learning of more than 30 cases
- Each case chosen to illustrate specific learning points
- A detailed workbook containing all cases to be discussed will be posted to your specified address before the course to enhance the learning experience

Course Programme*

08:30	Technical test session for delegates
09:10	Welcome and introduction
09:15	Session 1: Detection and staging of pancreatic cancers
11:00	Break
11:15	Session 2: Therapy and post-therapy imaging of pancreatic cancer
13:00	Lunch
14:00	Session 3: Cystic lesions of the pancreas
15:45	Break
16:00	Session 4: Rare tumours and mimics of pancreatic malignancy
17:45	Close

Faculty

Prof. Giovanni Morana,
Hospital Ca' Foncello,
Treviso, Italy

Prof. Maria Antonietta Bali,
Institut Jules Bordet,
Brussels, Belgium

Prof. Marc Zins,
Hôpital Paris Saint Joseph,
Paris, France

Prof. Wolfgang Schima,
Krankenhaus Göttlicher Heiland,
Vienna, Austria

Registration Fees

ICIS members
£349 per person

Non-members
£389 per person

Please note that delivery of your workbook will be subject to an additional charge as follows: UK £10/ Europe £20/ Rest of world £30

How to Register

Register online by going to icimagingociety.org.uk and 'Online Courses' pages.

Or

Download this form and post to:
**ICIS, 41 Waddington Way,
London, SE19 3UB.**

CPD

Attendees will receive a certificate with 7 CPD credits awarded according to the CPD scheme of the Royal College of Radiologists.

Important information

Please complete all registration details. Full payment must be received by 17 February 2023. Registration will not be confirmed until full payment has been received. Reservations are subject to availability and will be confirmed within one week from receipt of completed booking and full payment.

Refunds (minus an administration charge of £70) will only be made if written notification is received by 17 February 2023. Thereafter no refunds will be made.

ICIS Membership

ICIS membership is open to all individuals with an interest in cancer imaging for only £80 per year. Join ICIS today and benefit from reduced registration fees at ICIS teaching courses. Membership benefits include:

- Discounted registration fees for the Annual Teaching Course and ICIS interactive one day workshops
- Access to our Members' only section of the website where you can view our webinars, lectures from previous meetings, as well as all our scientific and educational posters
- 20% discount on article processing fees for our journal Cancer Imaging
- Save 20% on CRC Press radiology and oncology publications
